

Tsunami[®] TSU-1000

The Premium 16-Bit Digital Sound Decoder - only from SoundTraxx.

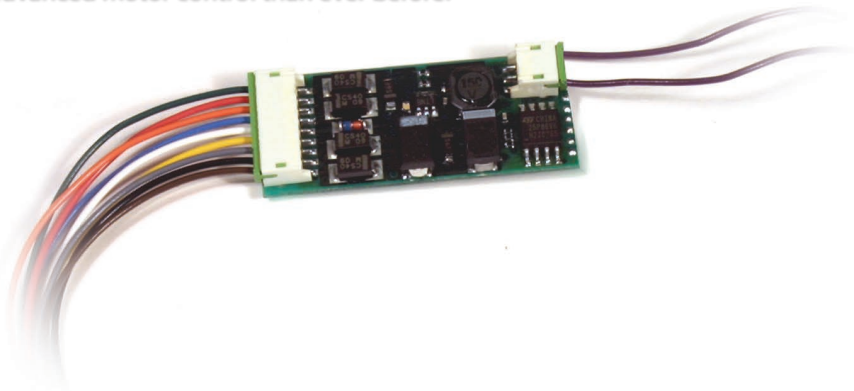

The next wave in digital sound technology is here! SoundTraxx[®] Tsunami[®] Series Digital Sound Decoders[™] are high performance sound systems for the model railroader of the new millennium. These miniature modules provide the benefits of today's Digital Command Control (DCC) technology with the addition of high quality, digital onboard sound. Waves of pure 16-bit digital sound will delight your senses, with effects so amazing you won't believe your ears. This sound system is so complete, it comes with its own equalizer! Tsunami's sound features are matched only by its superior motor control and brilliant lighting effects, making it unsurpassed in its technological capabilities.

Tsunami Digital Sound Decoders are designed to be installed inside your locomotive and come with universal harnesses allowing them to easily adapt to a variety of engines. Tsunami Digital Sound Decoders are available in both Steam and Diesel versions, each featuring a full spectrum of prototype-specific sound effects. While Tsunami is first and foremost a premium DCC sound decoder, it is also capable of operating on a DC, or 'analog' layout. Take your prized locomotive to visit a layout running with a conventional powerpack!

Tsunami's sound features are matched only by its superior motor control and brilliant lighting effects, making it unsurpassed in its technological capabilities. A 16-bit Digital Signal Processor provides the necessary horsepower Tsunami needs to support more functions, sound effects and advanced motor control than ever before!

Model TSU-1000 Specifications
