

The Passenger Coach Lighting Kit. Accessory Decoder for DC and DCC

About the Passenger Coach Lighting Decoder

This decoder offers flicker-free operation in both DC and DCC. Using our SuperCap™ technology, the decoder maintains power at short station stops in DC for as much as two minutes. With your DCC system, take advantage of the various lighting functions included in the board.

Our lighting decoder also comes with three extra functions for additional interior lights or marker lamps. Although this decoder was designed by SoundTraxx specifically for the Blackstone Models HOn3 Jackson and Sharp Passenger Coach, this decoder can also be used in other small cars or coaches. Once installed in a Blackstone Models passenger coach it secures neatly to the underside of the roof. For full installation instructions please refer to the documentation included in the decoder packaging, or visit our website at: www.soundtraxx.com and click on the link to the manuals page.

Part Number: 810136

Dimensions:

124 x 12 x 8mm

Voltage: 27V

Function Current: 100mA (each output)

Function Outputs: 4

- **FX5:** 3 Interior Lights Onboard golden-white LEDs
- **FX6**
- **F0(F)**
- **F0(R)**

Decoder Features

- Plug and Play installation
- NMRA compatible
- DC and DCC operation
- SoundTraxx® SuperCap™ technology
- Supports Advanced Consisting
