Athearn® Genesis® 4-6-6-4 Challenger

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound 4-6-6-4 Challenger model (announced in July 2003), you'll want to install a TSU-2200 Steam decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have a Challenger model without sound that you would like to upgrade, purchase SoundTraxx P.N. 884002. This board is designed to simply plug into the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**

Tsunami² The Sound Upgrade
