Athearn® Genesis® 4-8-2 MT-4

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound 4-8-2 MT-4 model (announced in January 2008), you'll want to install a TSU-2200 Steam decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have an Mt-4 model without sound that you would like to upgrade, purchase SoundTraxx P.N. 884002. This board is designed to simply plug into the factory PCB that supplies power to the locomotive. **You can complete the installation in one hour or less with no modification required to the model!**

Tsunami² The Sound Upgrade
