Athearn® Genesis® F7A & F7B

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound F7A or F7B model (announced in April 2001), you'll want to install a TSU-PNP EMD decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have an F7A or F7B model without sound that you would like to upgrade, purchase SoundTraxx P.N. 885013. This board is designed to simply replace the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**

Tsunami² The Sound Upgrade
