Athearn® Ready To Roll® AC4400CW & C44-9W

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound AC4400CW or C44-9W model (announced in April 2003), you'll want to install a TSU-PNP GE decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have an AC4400CW or C44-9W model without sound that you would like to upgrade, purchase SoundTraxx P.N. 885014. This board is designed to simply replace the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**
