

● Easy: 1-2 hours

## Athearn® Ready To Roll® F7A & F7B

To add a SoundTraxx Econami Digital Sound Decoder to your non-sound F7A or F7B model (announced in May 2002), you'll want to install an ECO-200 Diesel decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have a F7A or F7B model without sound that you would like to upgrade, purchase SoundTraxx P.N. 882002. This board is designed to simply plug into the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**

### The Sound Upgrade

SoundTraxx Sound Decoder	ECO-200, P.N. 882002	\$84.95
