

Athearn® Ready To Roll® U50

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound U50 model (announced in October 2010), you'll want to install a TSU-2200 GE Diesel decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have a U50 model without sound that you would like to upgrade, purchase SoundTraxx P.N. 885006. This board is designed to simply plug into the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**

Tsunami² The Sound Upgrade
